TECHNICAL SKILLS

- Languages : C, Java, Python, Javascript.
- Technologies & Tools : Tailwind CSS, Bootstrap, React.js, Node.js
- Databases : MySQL, MongoDB.

WORK EXPERIENCE

National Institute of Technology-Internship.

As an intern at the National Institute of Technology. I had the opportunity to apply deep learning algorithms to solve real-world problems across various domains.

My responsibilities included:

- Designing, Implementing, and Fine-tuning deep learning models to tackle specific problems, leveraging techniques such as Long Short-Term Memory (LSTM), Convolutional Neural Networks (CNNs), and Transformers.
- Collecting, Preprocessing datasets to train and evaluate the performance of deep learning models.

PROJECTS

- Food Recipe app (Reactjs, MongoDB, API)
this app allows users to search for any recipe by simply entering the desired ingredients or dish name.
- Weather App (Reactjs, MongoDB, API)
WeatherApp is a user-friendly web application developed using React that allows users to easily search and retrieve real-time weather information.
- Voice Assistant(Python)
Developed a voice assistant for seamless interaction and task execution, enhancing user experience.

EDUCATION

Vaagdevi College Of Engineering.

Computer science Engineering (Artificial Intelligence And Machine Learning)

CGPA 8.0

CERTIFICATIONS

- Full Stack Web Development
- Machine Learning with Python
