

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. CSE(AI ML)	Vaagdevi College of Engineering	8.14	2022-25
Diploma	Balaji Institute of Technology and Sciences	6.76	2019-22
Secondary	SSC Board	8.70	2019

EXPERIENCE

NIT Warangal

Deep Learning Intern (INTERNSHIP)

• Conducted research on text analysis using deep learning at NIT Warangal. Applied machine learning techniques for sentiment and topic analysis. Utilized NLP frameworks like BERT for accurate text classification.

• Designing, Implementing, and Fine-tuning deep learning models to tackle specific problems, leveraging techniques such as Long Short-Term Memory (LSTM), Convolutional Neural Networks (CNNs), and Transformers.

• Developed models for real world text processing applications. Focused on feature extraction, model training, and evaluation.

Dec 2023 - Jan 2024

PROJECTS

- Sign Language Detection

Machine learning project

Github

– We have built an ML model that will take a video as input and give the word that the person is showing. It will be a useful model for deaf people to convey their thoughts to other people.

– Made using: Tensorflow, Keras, Python
- Social Media Web App

Web Development

Github

– Build a full stack web application - A social media app to connect and follow people and also share, view, like, and comment on each other’s posts

– Made using: React, Node.JS, MongoDB
- Platform to buy and sell:

Web Development

Github

– Designed a website where the vendors can sell their products, and users can purchase them. It has three different interfaces, i.e., for users, vendors and admin

– Made using: Flask, HTML, CSS, Bootstrap, Javascript, MySQL

TECHNICAL SKILLS

- **Programming:** Java, Python(familiar)

• **Development:** HTML, CSS, JavaScript, Bootstrap, MERN Stack

• **Databases:** MySQL, MongoDB(familiar)

• **Deep learning:** Familiar with Tensorflow, Keras, Standard Deep learning models and concepts

CERTIFICATIONS

- Full Stack Web Development,

• Cloud Computing - AWS,

• Machine Learning with Python,

CONFERENCES AND SEMINARS

- International Conference on Material, Design Innovations and Energy System Optimization (ICMDESO 2025)

ANIL NEERUKONDA Institute of Technology and Sciences (ANITS), Visakhapatnam

28/03/2025 - 29/03/2025

– Presented a research paper focused on detecting sarcasm in textual data using a pre-trained BERT model. The work explored natural language processing (NLP) techniques, contextual embeddings, and transformer-based architectures to accurately identify sarcastic content in social media and conversation datasets. Achieved significant accuracy improvements through fine-tuning and data augmentation, contributing to advancements in sentiment analysis and AI-based content moderation systems.
